Live the retirement you envisioned with a plan that tailors to your every need

Optimise your retirement income with flexible and customisable features

Retire earlier or later, you can decide anytime

Choose your target retirement age between 50 and 75 to start receiving your target monthly retirement income.¹ If your plans change, simply bring forward or defer the payout by the year.

Adjust your retirement income to suit your needs

1. Decide on your desired target monthly retirement income

From a minimum of S\$500 per month for the Regular Premium plan or S\$800 per month for the Single Premium plan, the choice is yours. Should you wish to increase or reduce that amount, you can do so after the first policy year. You'll receive your target retirement income¹ upon your selected target retirement age.

You may also choose to stay invested during your retirement years with the flexibility to stop receiving any monthly retirement income as you focus on value growth of your investments.

2. Counter inflation with a yearly stepped-up income

Inflation does not retire when you do. To ensure that your retirement lifestyle remains unaffected by rising inflation rates, you can choose to receive a yearly stepped-up income from a range of 0% – 5%.

Be prepared for life's changes and the impact of inflation

Mr. Lee, a small business owner aged 40, purchases AIA Platinum Retirement Elite (SGD) and opts for the 5-year Regular Premium plan. Based on his risk assessment, AIA Elite Adventurous Fund was recommended. He hopes to retire at age 65 with a monthly income of S\$10,000 over 15 years. To minimise the impact of inflation, he has also opted to receive a yearly stepped-up income of 3%.

Notes: Figures (SGD) quoted above are for illustrative purposes only. The illustrated 8.0% p.a. investment rate of return for AIA Elite Adventurous is calculated based on the historical performances of the combination of Bloomberg Barclays Global Aggregate Corporate Total Return Index and MSCI World Total Net Return Index using its target asset allocations.

Based on the illustrated 4.0% p.a. investment rate of return, the total retirement income received would be S\$648,689. The illustrated 4.0% p.a. investment rate of return is set out in accordance with the Life Insurance Association Singapore (LIA) guidelines on policy illustration for Investment-linked policies.

These indices are the benchmarks for the ILP sub-fund. Please note that past performance is not indicative of future performance. They are purely illustrative and do not represent the upper and lower limits of the investment performance.

General Notes:

- ¹ A minimum accumulation period of 10 years must be fulfilled before the retirement income payout starts. The actual payout period is subject to the target monthly retirement income and the value of your policy. In the event where the ILP sub-fund(s) are underperforming or if there are any withdrawals from the policy, the fund value may deplete even faster and the policy may terminate before the desired income payout period.
- ² To qualify for the Power-Up Bonus, your policy must be in force on the bonus declaration date and premiums payable are up to date. Power-Up Bonus may be adjusted if partial withdrawals are made from the policy value.
- ³ All top-ups will incur a premium charge of 3% of the top-up premium.

Important Notes:

This insurance plan is underwritten by AIA Singapore Private Limited (Reg. No. 201106386R) ("AIA"). All insurance applications are subject to AIA's underwriting and acceptance.

AIA Platinum Retirement Elite is an Investment-linked Plan (ILP) offered by AIA. Investments in this plan are subject to investment risks including the possible loss of the principal amount invested. The performance of the ILP sub-fund(s) is not guaranteed and the value of the units in the ILP sub-fund(s) and the income accruing to the units, if any, may fall or rise. Past performance is not necessarily indicative of the future performance of the ILP sub-fund(s).

The actual policy value will depend on the actual performance of the policy as well as any alterations such as variation in the Insured Amount or premium, such as premium holiday or partial withdrawals. There is a possibility that the policy value will fall to zero and in this case, the policy will be terminated. Policyholder can avoid the policy lapsing by topping up additional premium.

You should seek advice from a qualified advisor and read the product summary and product highlights sheet(s) before deciding whether the product is suitable for you. A product summary and product highlights sheet(s) relating to the ILP sub-fund(s) are available and may be obtained from your AIA Financial Services Consultant or Insurance Representative. A potential investor should read the product summary and product highlights sheet(s) before deciding whether to subscribe for units in the ILP sub-fund(s).

Investment risks include foreign exchange risks and in addition, the Singapore dollar return for USD denominated policies (where applicable) will depend on prevailing exchange rate which may be highly volatile.

This brochure is not a contract of insurance. The precise terms and conditions of this plan, including exclusions whereby the benefits under your policy may not be paid out, are specified in the policy contract. You are advised to read the policy contract.

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid. You should consider carefully before terminating the policy or switching to a new one as there may be disadvantages in doing so. The new policy may cost more or have fewer benefits at the same cost.
